

MASTERPIECES *of* THE MINERAL KINGDOM

Wrested from the depths of the earth, yet possessing an almost
unearthly beauty, these Masterpieces of the Mineral Kingdom
are naturally formed works of art

MASTERPIECES *of* THE MINERAL KINGDOM

Experience a breathtaking exhibition unlike any other as Exhibits Development Group proudly presents **Masterpieces of the Mineral Kingdom** in partnership with the renowned Houston Museum of Natural Science (HMNS).

For the very first time, HMNS will tour its extraordinary minerals collection to captivate and educate audiences far and wide. Prepare to be awestruck by the sheer magnificence of nature's finest creations.

Curated by Joel A. Bartsch, President and CEO of HMNS, this exhibition showcases over 50 of the most striking and colorful mineral crystals from around the globe. This awe-inspiring collection is a testament to the incredible diversity and magnificence of Earth's geological treasures, offering a unique opportunity for your museum to engage and educate visitors of all ages. These spectacular specimens are true masterpieces — the Rembrandts and Picassos of the natural world.

EXHIBITION INCLUDES
